Dear Sarash,

I am writing this letter to you to let you know that we successfully concluded the **XXII Symposium UANL: Cattle fattening in corral**. This meeting took place at the University Theater of the Universidad Autonoma de Nuevo Leon (<http://www.uanl.mx/en>) from October 1st to October 2nd 2019 in the city of Monterrey, Nuevo León, México. This year, we had over 580 delegates including producers of beef cattle (~60%), Professors and other people from Academia as well as consultants and sales personnel (~20%) and students from various Universities (~20%). A total of 14 speakers gave lectures related to gut microbial ecology, including Distinguished Prof. [T.G. Nagaraja](#) from Kansas State University with his talk "Ruminal acidosis in beef cattle: A multidisciplinary approach to understand etiology and develop prevention strategies", Dr. [Luis Tedeschi](#) from Texas A&M University with this talk "Recent advances of using yeast to reduce ruminal acidosis and heat stress", and Dr. [Suzanne Ishaq](#) from the University of Maine with her talk "Microbial livestock: raising cattle with good microbes in mind". **The valuable funds from ISME were used to cover the flight ticket and hotel from Dr. Ishaq.**

Attached to this report you will find a series of pictures and videos of this important event as well as the reimbursement form as requested by Dr. Nicole Webster, the Director of the ISME Ambassador Program. Thank you for your continuous support.

  
Jose F. Garcia Mazcorro, Ph.D.
