Ramon Margalef Summer Colloquia 2018

Workshop on Sequence Analysis

CSIC

Workshop

Sequence analysis for microbial ecology

November 5th - 7th 2018

Keynote lecturer
Dr. Daniel Lundin (Linnaeus University, Sweden)

About
The aim of this intensive workshop is to introduce and discuss current pipelines of analyses of sequencing data in the field of microbial ecology. The workshop will train the participants on the practical aspects of data analysis through R/Bioconductor for data science.

	Day 1	Day 2	Day 3
Lectures & Discussion	16S amplicon sequencing	Read-based annotation meta-omics	Assembly-based annotation meta-omics
Practical	R: tidyverse-1	R: tidyverse-2	R: tidyverse-3

Organizers
María Vila-Costa (IDAEA-CSIC)
Ramiro Logares (ICM-CSIC)

Support committee
Elena Cerro-Gávez (IDAEA-CSIC)

Practical information
Deadline for applications: first come, first served
Send email for registration to: maria.vila@idaea.csic.es
Attendees: 20 participants
Location: IDAEA-CSIC (BCN)
